

Description

This application provides a supplier the possibility to order all released goods (granulate, sheet metal parts, etc), which are in provision of material, from a BSH factory. Supplier can create, modify and display Sales Orders.

Transaction in Old Supplier Portal

This new functionality replaces “Sales order creation”, “Sales order change” and “Sales order display” in old Supplier Portal.

Features

How to display a list of sales orders created for the month?

To display a list of sales orders, you would enter the range of dates (for future, past or current orders) and click “Go” (in the example below it is for September):

The screenshot shows the B/S/H/ Supplier Portal interface. At the top left is the B/S/H/ logo. In the top right, there is a navigation bar with 'Sales Order' in orange, a dropdown arrow, a 'Global' dropdown menu, and navigation icons for back and home. Below the navigation bar are three input fields: 'Supplier:' with the value '369648', 'Factory Location:' with the value '5041 - FRFG, Giengen, DE', and 'Ship To:' with the value '2001014702'. Below these fields is a label '*Pick Up Date:' followed by two date input fields: '01.09.2018' and '30.09.2018', each with a calendar icon. To the right of the date fields is an orange 'Go' button.

This brings up a table like below, where all orders within that date range are displayed in a calendar-based table. Where every order you click brings up a brief description underneath. The calendar can be viewed in weeks or months formats (if you wanted to display the orders over a longer period of time), by clicking the time drop down box in the top left corner

How to create a new sales order?

You should click 'Add' in the bottom right corner.

B/S/H/

Sales Order

Global

Supplier:

369648

Factory Location:

5041 - FRFG, Giengen, DE

Ship To:

2001014702

*Pick Up Date:

How to increase the quantity of an order already created?

To do this the supplier would search their order calendar (like the first step), containing the dates of the order(s) they wish to change. Once they have found the correct order, clicking that order highlights it and brings a description up below.
